Hong Kong Baptist University
Computer Science Summer Camp 2003

Organized by Computer Science Department, Hong Kong Baptist University
Co-organized by Summer Youth Programme Committee

Aims

This summer camp aims to help secondary school students develop innovative thinking and problem-solving ability through a series of workshops. The summer camp provides exposure to current information technology in building simple robotic games, network security and multimedia computing. This summer camp provides refreshing approaches to learning novel concepts in computer science and cultivates the student's interest in the area of information technology. Games, communication workshops and sports activities will also be held.

Programme Highlights

The summer camp is of three days and two nights held in the Hong Kong Baptist University.
Robot games workshop:
　　　Building simple and fun robot with Java and IBM robocode
Network security workshop:
　　　Discovering the essentials about security and encryption
Vector graphics workshop:
　　　Using Scalable Vector Graphics for generating animation and creating games on internet
Communication workshop:
　　　Improving communication skills and building self-confidence
Urban orienteering competition, Linux seminar, Mentoring and sharing events, Sports activities, and Orientation games.
